YOUR LOGISTICS CHALLENGES SOLVED

Seabourne Logistics is a logistics service provider with a global network, specialising in the field of international and local express services, freight services, warehousing and distribution.

“The Seabourne difference” is our genuinely personal service and total flexibility, which allows us to leverage group-wide expertise and tailor our service to suit each individual customer requirement. This means we develop true partnerships that add value and build trust.

- Seabourne was founded in 1962 by Sir Clive Bourne
- Europe's first express delivery network
- We are proud to have serviced the South African and African market for over 15 years
- Through world class personal service, Seabourne has built an exceptional company on communication, flexibility and commitment 24/7
- We create an integral partnership with you to add value to your supply chain
- You have direct access to our valued staff - not only a call centre
- Our technology provides customised solutions through effective tracking, integration and warehousing systems

Domestic Services

Overnight Express

Delivery made by 11am the following working day to all major centres

Economy

Delivery within 2-3 working days to all major centres

Normal Delivery Express

Delivery within 1-2 working days to all major centres

International Services

Courier

International express courier service for time sensitive documents/parcels

Economy Airfreight

An economical way of moving international air cargo goods at reduced prices (not time sensitive)

Cross Border Roadfreight

Various cross border road freight options to selected countries from small parcels to container loads

Imports

Collecting from most international destinations

Sea Freight

A worldwide service for sea freight shipping of any size, from full load cargo containers to out-of-gauge projects and roll-on, roll-off to break-bulk cargo.

Warehousing

Warehousing across ZA in all main centres – JNB, CPT, DUR, BFN, ELS, PLZ – as well as in outlying areas through agents. We fulfil all warehousing requests, from inbound, inventory management, outbound, VAS activities as well as a full suite of reverse warehousing needs. We use our own WMS with a full suite of integration options.

Warehousing operations are designed to integrate seamlessly with importing, local courier, cross-border and international handling. Warehouses are audited annually by clients against European standards; audits include H&S, Security, HR, operational KPIs and process stability.
